RE: Incorporation of Construction Permits into Existing Title V Operating  
Permits as a Minor Modification

Dear Sir or Madam:

The incorporation of construction permits into issued Title V permits differs from the process followed by the existing state operating program.

The project covered by the enclosed construction permit(s) has been identified by our permitting staff as requiring a minor modification to your facility's Title V permit. Please use the draft letter on the reverse to prepare your request for updating your operating permit. This letter will also satisfy the requirements of S.C. Regulation 62.1, § II.B.1 and must be submitted to the Department at least fifteen days prior to placing the new or modified unit(s) into operation.

If you have any questions on this procedure or what to submit please contact the permitting staff member listed on the cover page of the attached construction permit(s.)

Sincerely,

Robert J. Brown, Jr., Assistant Director  
Engineering Services Division  
Bureau of Air Quality
